Paul McJannet

Full-Stack Web Developer — *Frontend Focus*

Ottawa, ON 613-898-0378 mcjannetp@gmail.com paulmcjannet.com github.com/paul-mcj linkedin.com/in/paul-mcjannet

Full-stack web developer and Algonquin College Web Development program graduate (Dean's Honours List, every semester). Builds and ships applications with React, Next.js, and Django, and deploys them with CI/CD on Cloudflare and Vercel. Holds a Government of Canada Reliability security clearance; previously CCNA certified.

TECHNICAL SKILLS

Languages	JavaScript/TypeScript, Python, SQL, HTML, CSS
Frameworks & libraries	React, React Native, Next.js, Node.js, Django & Django REST Framework, Tailwind
Tools & platforms	Git/GitHub, GitHub Actions (CI/CD), REST APIs, Cloudflare ecosystem, Vercel, Vite, Vapi, Jira

PROJECTS

Volinix Studio — *Company website · Next.js, TypeScript, Tailwind, Cloudflare* Live site

- Built a multi-page App Router site using a custom reusable project template that generates page metadata, JSON-LD structured data, and sitemaps through distinct client configs
- Contact submissions POST via a React Server Action to a token-authenticated Cloudflare Worker; images are served via Cloudflare Images loader; enforced performance, accessibility, and security via GitHub CI Actions

FODMAP Recipe App — *Full-stack recipe sharing application · React, Tailwind, Django, PostgreSQL* GitHub

- Built a Django REST Framework backend with JWT-auth registration and login, modeling relational data in PostgreSQL
- Built the frontend in React and Vite, consuming the secured API

AI Voice Agent — *AI appointment booking assistant · JavaScript, Node.js, Cloudflare, SQLite, Vapi* Live demo

- Built serverless webhooks to power AI phone agent that books, reschedules, and cancels service calls
- Uses single endpoint authentication; normalizes inconsistent payloads; dispatches to unique dependency-injected tools; includes double-booking prevention logic, multi-tenant database routing, and Vitest test run against real database bindings

Speech Recognition Maze — *Voice-controlled browser game · React, Vite, TensorFlow.js, Tailwind* GitHub · Live demo

- Built a maze game where a speech model classifies spoken commands ("up," "left") in real time to move the player
- Wrote procedural maze generation and state-driven movement logic; responsive UI using Tailwind

EXPERIENCE

Volinix Studio — *Founder & Lead Developer (Nov 2025 - Present)*

- Building a reusable Next.js starter template with authentication, SEO and cutting new-site setup from days to hours
- Set up automated CI/CD GitHub Action pipelines and dependency auditing across all repositories
- Implement structured data (JSON-LD) and Next.js Metadata API for search visibility; builds to web accessibility standards

Canada Revenue Agency — *Administrator (Feb 2023 – Aug 2024)*

- Investigated and resolved recurring issues in legacy SAP software by researching vendor documentation and coordinating fixes with administrative and management teams
- Proposed workflow and data-handling improvements to senior management via Microsoft Excel automation

EDUCATION

Algonquin College — *Web Development and Internet Applications (Sep 2024 – Dec 2025)*

- Graduated with high distinction; Dean's Honours List every semester
- Coursework: end-to-end application development, database design, network security, modern architecture standards
