

Paul McJannet

Full-Stack Web Developer — Frontend Focus

Ottawa, ON 613-898-0378 mcjannetp@gmail.com paulmcjannet.com github.com/paul-mcj linkedin.com/in/paul-mcjannet

Full-stack web developer and recent Web Development graduate (Dean's Honours List, every semester). Builds and ships applications with React, Next.js, and Django, and deploys them with CI/CD on Cloudflare and Vercel. Holds a Government of Canada Reliability security clearance; previously CCNA certified.

TECHNICAL SKILLS

Languages	JavaScript / TypeScript, Python, SQL, HTML, CSS
Frameworks & libraries	React, React Native, Next.js, Node.js, Django & Django REST Framework, Tailwind CSS
Tools & platforms	Git/GitHub, GitHub Actions (CI/CD), REST APIs, PostgreSQL, Cloudflare Pages & Workers, Vercel, n8n, Vite, Jira / Agile
Other	Reliability security clearance (Government of Canada); previously CCNA certified

PROJECTS

NetBox AI ChatOps Agent — AI assistant for network IP management

[GitHub](#)

- Built a chat interface that lets users query and update a NetBox IPAM instance; deployed on Cloudflare Pages and Workers
- Implemented LLM function calling against the NetBox REST API so the assistant can reserve IPv4 addresses, allocate subnets, and update device records autonomously

Speech Recognition Maze — voice-controlled browser game

[GitHub](#) · [Live demo](#)

- Built a maze game in React and Vite where a TensorFlow.js speech model classifies spoken commands (“up,” “left”) in real time to move the player
- Wrote procedural maze generation and state-driven movement logic; responsive UI in Tailwind CSS

FODMAP Recipe App — full-stack recipe sharing application (in active development)

[GitHub](#)

- Built a Django REST Framework backend with JWT-auth registration and login, modeling relational data in PostgreSQL
- Built the frontend in React and Vite, consuming the secured API

Beer Order App — e-commerce single-page app

[GitHub](#) · [Live demo](#)

- Built a React SPA with cart and global state managed through the Context API and custom hooks; client-side routing with React Router and a JSON product catalog

EXPERIENCE

Volinix Studio — Founder & Lead Developer (Nov 2025 - Present)

volinix.ca

- Building a reusable Next.js starter template with authentication, SEO and cutting new-site setup from days to hours
- Set up automated CI/CD GitHub Action pipelines and dependency auditing across all repositories
- Implement structured data (JSON-LD) and Next.js Metadata API for search visibility; builds to web accessibility standards

Canada Revenue Agency — Administrator (Feb 2023 – Aug 2024)

- Investigated and resolved recurring issues in legacy SAP software by researching vendor documentation and coordinating fixes with administrative and management teams
- Proposed workflow and data-handling improvements to senior management via Microsoft Excel automation

EDUCATION

Algonquin College — Web Development and Internet Applications (Sep 2024 – Dec 2025)

- Graduated with high distinction; Dean's Honours List every semester
- Coursework: end-to-end application development, database design, network security, modern architecture standards
